

Inter-Personal Skills Are Critical To Six Sigma Success

Having the proper Six Sigma Training is essential to the success of a Six Sigma Process. There are so many tools and principles that need to be learned that it is easy to get overwhelmed. However, when you take the time to check into Six Sigma even further, you'll realize that there are a whole other set of tools that you'll need to have. These tools are about your personality and the personality of those working in your business.

You must be passionate for success, and you must be determined and driven to succeed, no matter what. You will need to be able to communicate effectively with your employees as well as the team that is working on the Six Sigma Process. This is one of the most essential personal tools needed.

You should also be able to utilize change agents to keep everyone receptive to the process improvement projects, and you should be able to reassure everyone yourself that the improvements are for the good of the company, and what's good for the company is good for the employees. The only problems that you might run into here are that people will think that the waste reduction parts of Lean principles applied to Six Sigma might jeopardize their jobs, roles, or positions within the company. This could create a hostile environment, so do your best to ensure everyone that their jobs are secure and that the change is for the betterment of everyone.

You need to be able to deal with difficult employees, and the stress of running a project, in order to successfully complete your project. Six Sigma projects can be very stressful, and difficult, so you need to make sure you have the patience and determination to see the project through to the end.

Formal Six Sigma training is critical if you are going to implement Six Sigma in your business, but it is not the only important factor in running a successful Six Sigma project. Six Sigma projects can be very stressful, and difficult, and if you are going to run a Six Sigma project you need to make sure that in addition to Six Sigma training, you have the patience, determination and communication skills necessary to be a successful project leader.
